<u>SECTION 9.02 WATER AND SEWER CONNECTION FEES</u>					
Pursuant to Section 66001 of the Government Code, the City Council hereby determines:					
(1) The purpose of the water and sewer connection charges is to assure payment by developers or their pro rata share of the escalated cost of the City's water and sanitary sewer system.					
(2) The charge will be used to reimburse the City for the owner or developer's fair share of the use of the water system and sanitary sewer systems.					
(3) There is a reasonable relationship between the use of the fees, the need for a water system, a wastewater treatment plant, and the types of development projects upon which the fee is imposed. All development projects create varying needs for the consumption of water which cannot be fulfilled unless the project is connected to the municipal water system to assure an adequate supply of water to each project. Plus, each project creates a need for sewage conveyance, disposal and treatment. The degree to which each project is charged is based upon factors related to the degree of potential usage, such as: type and size of projects, number of units, and calculations of the escalated cost of the City's sanitary sewer system; the current system capacity; the cost of conveyance, treatment and disposal per equivalent single-family dwelling unit; and the estimated daily discharge for each facility to be connected to the sanitary sewer system, taking into account proportionate average daily discharge of sewage, total organic carbon, sewage, total organic carbon, suspended solids, and ammonia nitrogen.					
The fees or charges shall be collected from the owner or developer of property either (1) prior to approval of the original connection of the property to the water or sanitary sewer system, or a redevelopment with incremental impact, or (2) in the event the uses being made of the property presently connected to the system are enlarged, added to, or further structures are constructed on the property.

SECTION 9.03 FIRE HYDRANTS

The following definitions shall apply to this section:

- (1) Hydrant service area shall be defined as the area that a hydrant will serve the normal fire protection needs as determined by the the City, taking into account the street pattern, typer of development, size of water service mains, and all other factors bearing on plans for fire prevention and suppression.
- (2) Frontage shall be defined as (a) that side of the lot on which the water service is installed to serve the lot for one-family or two-family residential corner lots, (b) the frontage measured along all public rights-of-way of the parcel being developed or improved for commercial, institutional, industrial, multiple family property.
- (3) Development or "Improvement" shall be deemed to occurwhen a Building Permit, Development Permit or Subdivision Agreement is required, except when the additional floor space is less than one additional residential unit or less than 1,000 square feet of additional gross floor area. In the case of developments other than residential, "development" or "improvement" shall also be deemed to occur whenever a parcel of property is redeveloped under a different zoning classification.

- A. FIRE HYDRANT SERVICE. The following fees shall be collected from the owner or developer of property at the time of the development or improvement of originalproperty or additional development or improvement of the property; provided, however, such fees will be payable only for the hydrant service area of a hydrant previouslyinstalled or to be installed at no other direct expense to the owner or developer.
